

Sustainable Food Production (SFP)

SFP.H4K Understand how to review Environmental Performance

Unit Summary

This unit is about understanding how to review and identify changes to organisation targets and objectives against environmental performance. The standard looks at the identification of changes and the development of a plan to implement these.

Related Units

This is a knowledge unit which underpins the skills set out in:
SFP.H4S Review Environmental Performance

You need to know and understand:

1. Benefits to the organisation and to the environment of improved environmental performance
2. Resources required to implement potential improvements to environmental performance
3. Current industry best practice associated with the environmental aspects of the organisation
4. How to record findings in a suitable format
5. How to identify the relevant interested parties and access their views
6. How to predict the environmental, social and economic benefits of potential improvements
7. How to reach valid, accurate and reliable findings
8. The reasons for and benefits of continual improvement of environmental performance
9. How to formulate and present recommendations for improvements to environmental performance
10. Key Performance Indicators associated with improvement to environmental performance

Key Words

Environmental performance	Measurable results of an organisation's management of its environmental aspects
----------------------------------	---
